

## Abacus VPN – Java 7 update 25 update

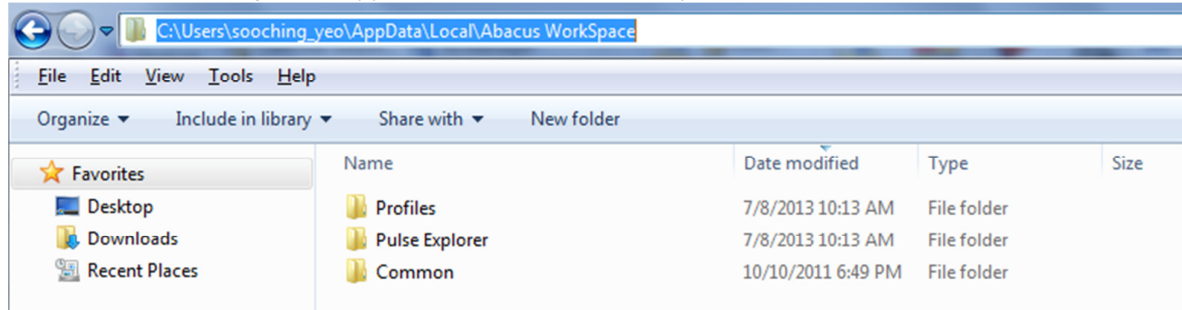

1. Right-click Abacus WorkSpace icon, select “Properties”
2. At “Target” field get the path

For example:

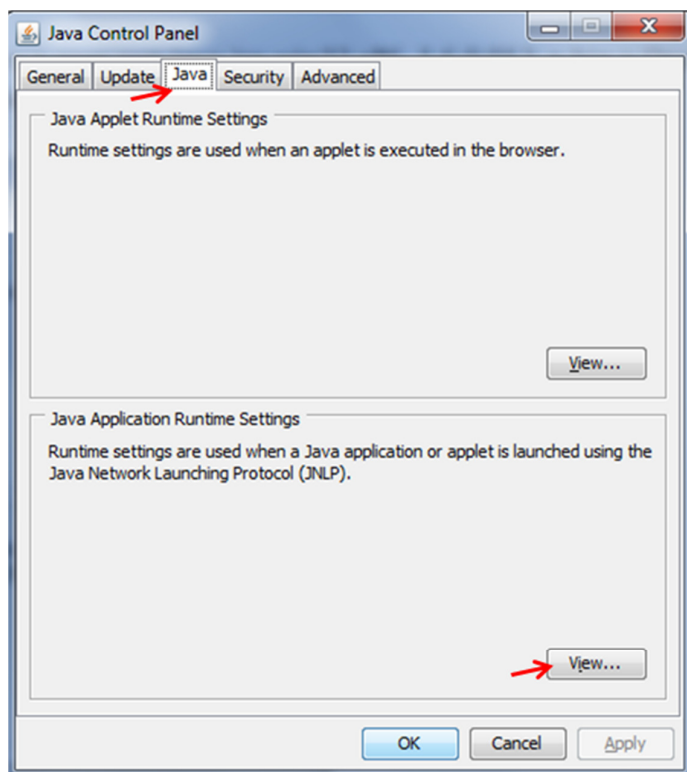

`C:\Users\<Window Login IN>\AppData\Local\Abacus Workspace\Profiles\<PCC_EPR>\abacusworkspace.exe`

3. Copy the path and go back 2 folders so you are on this folder

`C:\Users\<Window Login IN>\AppData\Local\Abacus Workspace`

4. From here go to Common > binary > com.sun.java.jre.win32.x86\_1.6.0.012 > bin > Open `javacpl.exe`
5. Go the Java tab and click on the “View” on the bottom of the dialog

6. In this view only leave checked the Java from Abacus WorkSpace **1.6.0 12**
7. After this is done quit any javaws process in the task manager and launch Abacus WorkSpace again.
